M79M+QXP, Itahari 56705

Career Objective

- To use my web development skills to develop innovative software solutions for a major tech company. And obtain a position in a company and utilize my talents and abilities to make a positive impact on the organization.

Projects

- Smart Blind Man Stick(IOT)**
"The 'Smart Blind Man Stick' integrates sensors, navigation systems, and audio feedback for enhanced mobility. Completed in just 45 days, it utilized C++, Python, Arduino, GPS modules, and sensors for development."
- Sarangi Sansar**
"Sarangi Sansar": A Java GUI project facilitating instrument buying, selling, and renting for musicians and enthusiasts. Utilizing Java Swing, JDGB, and MySQL, it offers enhanced functionality and user experience."
- Dekar Cosmetic**
Dekar Cosmetic: Luxury skincare and makeup at your fingertips. Shop seamlessly with our React Native and Node.js powered web and mobile apps.
- Luvya trading**
Luvya Trading: Engine Oil - Ensure optimal performance and longevity for your vehicle with our premium selection of engine oils.
- EasyHire**
EasyHire is a dynamic platform designed to seamlessly connect employers with workers for specific tasks or projects. By leveraging the MERN stack (MongoDB, Express.js, React.js, and Node.js), EasyHire provides an efficient and scalable solution for managing job postings, applications, and user interactions.
- Network Infrastructure Design and Implementation**
As an IT Support at Quest English Boarding School, I ensure all technology systems support academic and residential needs. I maintain hardware, software, and network security aligned with educational goals.
